# Introductory Certificate

---

# CILT International Introductory Certificate

## **Qualification Objectives**

The CILT International Introductory Certificate in Logistics and Transport offers a broad understanding of the principles, applications and concepts of logistics and transport industry. It gives students the opportunity to focus on an area of specialism to gain introductory knowledge of their professional sector.

## **Target Audience**

The CILT International Introductory Certificate in Logistics and Transport is designed for new entrants to the logistics and transport sector and is suitable for front line and supervisory staff working in the industry.

This is an open access qualification, although students would benefit from having some prior knowledge of logistics and transport operations and an awareness of the main principles of the industry.

# CILT International Introductory Certificate

## **Assessment**

All students must take and pass a written examination in the two mandatory units and two optional units. Each unit will be assessed by means of a 30-question examination paper. The exams will comprise a selection of multiple-choice questions and short answer questions requiring an answer in the form of short sentences or a simple calculation. The examination will be of 1 hour's duration. All examinations are closed book and the pass mark for each examination will be 50%.

## **Guided Learning Hours**

Total Duration: 2 months

## **Investment**

RM 3,500.00 per pax for the entire Certificate (HRD Corp Claimable)

# International Certificate

---

# CILT International Certificate

The CILT International Certificate in Logistics and Transport is a free-standing qualification, designed to provide a sound foundation for a career within the transport and supply chain fields and should provide potential supervisors and first-line managers with a complete set of management skills.

The CILT International Certificate follows on from the general knowledge gained in the CILT International Introductory Certificate and provides more in-depth information on the core business subjects and specialist areas.

The modules offered as part of this qualification can also be offered as stand-alone units, giving both students and employers maximum flexibility. This route may specifically appeal to employers who wish to target a very specific topic area (e.g. Port Logistics, Warehousing) for development as an in-house course, but then with the option for employees to move forward at a later date to 'top up' to certificate level. Note that any certification awarded on a modular basis will clearly state that the **award only relates to the specific module** and not to the whole qualification.

# CILT International Certificate
